The Mother said many things about Auroville’s economy and how it should be. Some of her statements are as follows:

Through the 33 years of field experiments, one finds nothing to ask in return than the joy of serving the Divine.

But to live in Auroville one must be the willing servitor of the Divine. We are here to give ourselves to the manifestation of the Divine Presence. And we got hundreds of thousands of people who gave a great boost to the collective maintenance.
