the maintenance system that has been
domesticated, it is a question of what can besaid
to encourage the maintenance of the community.

First, the community has been maintained by the
Auroville Maintenance Group. This group has,
for the last four months, been working on
evaluating the maintenance system and studying
how it can be improved. As a result of a
questionnaire that was distributed to the
community, it was found that about 85% of those
who depend on the maintenance fund believe
that an Aurovillian should be maintained at a
level of income that is sufficient to cover the
basics of life, such as food, clothing, and
shelter. But this level of income is insufficient
for many Aurovilians who are not depending on
the maintenance fund, such as those who have
personal financial resources.

A second factor that needs to be considered is
the maintenance mentality. It seems that a
community-wide discussion is needed to
understand how maintenance can be improved.
This discussion should involve all members of
the community, including Aurovilians,
individuals, and groups, to determine how
maintenance can be improved.

A third factor is the maintenance system itself.
It appears that the system is not adequate to
meet the needs of the community. This is
because the maintenance fund is not
adequate to cover the costs of living in
Auroville. It is necessary to increase the
maintenance fund or to find new sources of
financing.

A fourth factor is the role of the government.
It is necessary to work with the Indian
government to find a solution to the
maintenance problem. This could involve
negotiating with the government to increase
the maintenance fund, or finding other
sources of financing.

A fifth factor is the role of the community.
It is necessary for the community to take
responsibility for its own maintenance.
This could involve creating a maintenance
group or setting up a maintenance fund.

In summary, the key factors that need to be
considered are: maintenance mentality,
maintenance system, maintenance fund,
government, and community. It is essential to
address these factors to ensure that the
maintenance system is adequate to meet the
needs of the community.

The traditional nexus: money and power...

The maintenance allocation is done by a
sub-group, the Auroville Maintenance Group. This group has, for
the last four months, been working on
evaluating the maintenance system and studying
how it can be improved. As a result of a
questionnaire that was distributed to the
community, it was found that about 85% of those
who depend on the maintenance fund believe
that an Aurovillian should be maintained at a
level of income that is sufficient to cover the
basics of life, such as food, clothing, and
shelter. But this level of income is insufficient
for many Aurovilians who are not depending on
the maintenance fund, such as those who have
